### **DETAILED ACTION**

This is a first Office action on the merits for application serial number 10/767,862 filed January 29, 2004. Claims 1- 5 are pending.

#### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by US 2,749,262 Wiser. Wiser '262 discloses a reflective insulation and radiant barrier comprising an folded reflective sheet [fig 1] for positioning between structural members of a wall, a pair of creases 19,20 [fig 1,5], a pair of tabs 22 for securing the panel to the face of said structural members [fig 5,6], wherein the insulating panel bisects the cavity between the structural members.

In regard to claim 2, Wiser '262 discloses a reflective sheet comprising a substrate layer 10 with a reflective layer 12.

In regard to claim 3, Wiser '262 discloses a substrate layer 10 is Kraft paper [c2, 17-14].

In regard to claim 4, Wiser '262 discloses a reflective layer 12 comprises two layers of aluminum foil 12 [fig 5, c3, 146-55].

Claim 5 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wiser '262. Wiser '262 discloses a roll of reflective insulation [fig 1] which is installed between support members [c2, 146-70]. It would have been obvious at the time of the invention to one having ordinary skill in the art to have known to place the reflective insulation of Wiser '262 between support members, attach the tab at one end to a support member, spread the creases along the inside surface of the support members to form air pockets therein, and then attach the tab at the opposite end to the other support member.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
